» Nimius solution framework

Together with HP's high project management skills you will realize your personalized e-services today. The hp nimius framework has already been successfully implemented in the arena of e-banking, insurance, mutual fund advisory platform and travel portal services.

» Financial solution

The HP Nimius financial solution enables financial institutions to raise their business potential by completely integrating all customer channels.

» Travel portal solution

Nimius is HP's solution for personalized services.

» Mutual Fund Advisory platform

HP's sales and services platform for financial products such as funds - provide an excellent order routing and management functionality.

» Insurance solution

HP Personalized Insurance Services deliver value in a changing market.

Flexible architecture to grow with your business needs

The HP Nimius solution framework is a proven set of software components and guidelines to build secure, performant and transactional websolutions.

- Multichannel architecture and flexible backend integration
- Speeds up development cycle (API, guidelines)
- Based on open standards (J2EE, XML ...)
