

eCenter

The eCenter is the first and one of the largest strategic initiatives of the Helvetia Patria Group. It is directed towards realizing e-business solutions for brokers, agents, and distribution partners in the different European countries. The eCenter serves as an enabler for the subsidiaries to build front-oriented e-business applications on a central platform using common standards based on shared know-how.

eCenter Portrait

- The eCenter is a service of the Helvetia Patria Group to its subsidiaries to help realize e-business applications in the most economical manner based on a common platform.
- The eCenter builds on a multiplier-effect with regards to distributing and further developing e-business know-how.
- The central e-platform of the Helvetia Patria Group allows for a more efficient, faster and easier application development in the e-business field.
- Furthermore, the e-platform helps to optimize e-business spending by making central resources available to every subsidiary.
- Local e-business application development efforts are supported through the e-business competence center which is based in Zurich.
